

B. Amendment to the Claims

Please cancel claims 1-15, 19 and 26 without prejudice or disclaimer.

Please amend claim 21 and add new claims 28-30 as follows.

1-20. (Cancelled)

21. (Currently Amended) A multilayered structure resin molded product comprising a core layer and a skin layer,

wherein said resin molded product is injection-molded using a pulverized resin material, which is formed by pulverizing a molded product molded from a thermoplastic resin material, as a resin material for forming said core layer, and a virgin material as a resin material for forming said skin layer, and

wherein a board-shaped portion of said resin molded product has a projecting portion for mounting another part, and said projecting portion is formed integrally with the skin layer only from the same material as the skin layer by setting a thickness of said projecting portion to be smaller than a thickness of the board-shaped portion.

22. (Previously Presented) The product according to claim 21, wherein said projecting portion is a connecting portion having elasticity.

23. (Previously Presented) The product according to claim 21, wherein said projecting portion is a screw connecting portion.

24-27. (Cancelled)

28. (New) A multilayered structure resin molded product comprising a core layer and a skin layer,

wherein said resin molded product is injection-molded using a pulverized resin material, which is formed by pulverizing a molded product molded from a thermoplastic resin material, as a resin material for forming said core layer, and a virgin material as a resin material for forming said skin layer, and

wherein a board-shaped portion of said resin molded product has a projecting portion for mounting another part, and said projecting portion is formed integrally with the skin layer only from the same material as the skin layer by setting a height of said projecting portion to be greater than a thickness of the board-shaped portion by a specific value when a thickness of the projecting portion is greater than the thickness of the board-shaped portion.

29. (New) The product according to claim 28, wherein said projecting portion is a connecting portion having elasticity.

30. (New) The product according to claim 28, wherein said projecting portion is a screw connecting portion.
